

Jeevitesh Gaur

PRODUCT & INTERACTION DESIGNER

jeeviteshgaur28@gmail.com | Ahmedabad, India | Open to Bengaluru
[Portfolio / Behance](#) | [LinkedIn](#)

Product and interaction design student creating user-centred digital and physical experiences through research, prototyping, and iterative testing. Experienced in onboarding flows, educational games, and research-led concepts, with a particular interest in meaningful products for learning.

EXPERIENCE

AR/VR & Game Designer

Feb 2026 – Present

[Educai.8](#)

- Designed and prototyped two educational board games that help school students practise decision-making and explore potential career paths.
- Planned and conducted playtesting with 15+ students, translating observed behaviours and feedback into improvements to game mechanics, instructions, and interaction flow.
- Collaborated with the team to balance learning objectives with clarity, engagement, and age-appropriate gameplay.
- Exploring an AR/VR extension to create a more immersive and interactive learning experience.

UX Designer

Oct 2024 – Jul 2025

[YoChaakhoSa](#)

- Redesigned the website homepage and onboarding journey, translating business and brand goals into user flows, structured wireframes, and high-fidelity interface designs.
- Improved interaction clarity through reusable patterns, interface refinements, and purposeful micro-interactions.
- Presented design decisions to the founder and incorporated feedback; the final direction was approved as aligned with the organisation's vision.
- Created and edited 3–4 brand videos, extending the product's visual language across digital communication.

SELECTED PROJECTS

Hop and Shop — Civic Experience Design

2025

Ahmedabad Municipal Corporation brief

- Conducted contextual field research in a busy public market in Vasna, documenting user behaviours, environmental constraints, and stakeholder needs.
- Synthesised observations into key insights and opportunity areas for improving the market experience.
- Developed a research-led concept grounded in the needs and realities observed on site.

Raksh — Human-Centred Product Concept

Gaganyaan 2027 brief · Guided by ISRO-affiliated faculty

2025

- Selected as part of a small student team to address a human-factors challenge associated with extended space wear.
- Researched existing maximum-absorbency garment systems and translated technical and physiological constraints into a product concept.
- Collaborated on a concept intended to improve comfort and usability in an extreme environment; faculty presented it to the ISRO Chairman, where it received a positive response.

CORE SKILLS

Product Design	Interaction design, UX design, user-centred design, information architecture, user flows, wireframing, prototyping, and visual design
Research	Contextual inquiry, user interviews, observation, usability testing, research synthesis, and problem framing
Collaboration	Design critique, concept communication, stakeholder presentation, interdisciplinary collaboration, and iterative design
Tools	Figma, Framer, Adobe Illustrator, Adobe Photoshop, After Effects, Blender, Unity, and DaVinci Resolve

Bachelor of Design — Interaction Design

Anant National University · Minor: Product Design

2023–2027

Google UX Design Professional Certificate

In progress · Started Jul 2026

In progress

LEADERSHIP & ADDITIONAL EXPERIENCE

General Secretary, Student Council

Anant National University

- Progressed from General Committee Member to General Secretary and led a 20-member team responsible for student-welfare initiatives, events, campaigns, and campus-life improvements.
- Coordinated across students and university stakeholders, strengthening ownership, communication, and collaborative problem-solving.

Contingent Leader, Mood Indigo

IIT Bombay

2023–2024

- Led university contingents of 161 students in 2023 and 94 students in 2024; participating teams achieved four national-level wins in 2023 and two in 2024.

Tech Lead, TEDx Ahmedabad

Technical experience and event delivery

- Managed stage screens, sound, and speaker-facing displays, ensuring synchronisation between speaker cues and the audience experience.
